branches languages for instance, as many classes size as necessary are organized. A vacation of eight or ten days is granted during the Christmas houdess

dustrie Hôteliere and an institution for lodging the student boarders. The opening of the school is set for October 3, 1910. If desired the students may occupy rooms in the dormitory, which will. May, and the dry season from May to October 10. may occupy rooms in the dormitory, which will accommodate not more than six. The means are taken in common. The student will at all times be in constant touch with the director of the school, who will be a representative of the syndicate. Those students occupying quarters outside will present themselves twice a day for recitations as indicated in their programmes.

The number of boarding students for the first year has been limited to thirty. Two thirts or

year has been limited to thirty. Two thirds of this number will be reserved to members of the hotel syndicate of Paris and of the provinces, and winter to the freezing point. Snow is rare, even the provinces and the provinces are the provinces.

TO THE EDITOR OF THE SUN SO: IN THE SUN recently Kissena Fark was spoken of as a "noted awamp." In justice to flushing it should be said that the park is a place of great natural beauty, with a large amount of high land covered with

NEW YORK, August 10.

## LITTLE JERSEY BIRDS.

swarming along the banks and falling into the brook in great numbers.

Early this season in one mountain brook the trout were taking those big June bugs that come thundering against your lamp-chimneys on warm evenings, and an examination of the craws of captured flah would disclose from four to six of these insects.

Fagic Lake contains small mouth base, pike, perch, pouts, shiners and sunfish, and is very much fished all the year. The linited States Fish Commission at Washington has been sending us a few hundred bass fry lately, and it is believed that the bringing in of allen fish will improve the size and quantity of the catches.

Many trout of various kinds have been placed in Eagle Lake by the New York State torminssion, but no authentic record of any trout capture has been made. Both brook and brown trout have been introduced into the three tributary brooks and have done well there.

Many large pike and bass have in springtime gone over a low dam placed at the outlet to raise the waters of this lake and have thus been unable to return. Our property owners' association last year bad a screen made to prevent this loss of game fish, but it got choked up with driftwood and had to be removed.

### THE ROYAL ARCANUM. Explicit Statement of What One Member Sought In It.

TO THE EDITOR OF THE SUN-Sir. I have been a member of the Royal Arcanum ove wenty years, and have passed the sixty-five year limit. I joined the society to provide for the protection of my wife and children at my death, and not during my lifetime I am tired of hearing about the "protection we have had." The protection is to protect the helpless widow or other surviving members of the family, and unless this is accomplished the talk of protection is simply a nuggle of words, the talk of others having heen benefited is no answer to a helpless

Let me suggest that inasmuch as the Royal From Duly Consuler and Trade Reports.

The prevailing method of training young men for this business in Switzerland is to send them to the large hotels in foreign countries, where foreign languages and customs may be learned first hand and where lessons are learned that enable the young man to engage in business and put into practice the ideas he has gleaned in different parts of the world.

There is a Government lastitudion at level.

official Atflitude Toward the Green Case. TO THE EDITOR OF THE SUN-Sir: It appears that the desires or ideas of mem bers of the Royal Arcanum have no weight with those in power, as can be understood

It is practically a California reduced to about one twentieth in size, but markedly similar in genera The cost of board, lodging, and tuition is for a topography, climate, vegetation and agri-

tine as in California, with extremes of 110' to 119' the other third to French and foreigners who on the plateaus, and our farmers are practically wish to enroll.

# Wicked Arapahoes Foiled

Hearing that the Comanches were to receive a payment from the Federal Government, 300 Arapahoes, equipped with various gambling dewith a large amount of high land covered with large trees, a large lake, and a small area of marshy land where the lake empties out into a brook. I have lived near it for thirty-eight years and know. To call it a swamp makes people think it is all a When the Government heard of the plans of the bad Arapahoes an order was issued that the pay ment should not be made until after the Arape boes had gone home.
